Data table (current active only, no revisions/obsoleted)   <--- drop the table entirely

remove Name from data table so can add more columns
remove total counts line
change font for total volume to something smaller (similar to table header font)
ensure consistent number formatting (commas)
change data table to record format, i.e.
data files -   count, volume (size)
metadata files - count, volume (size)
total files -   count, volume (size) (providing there is sufficient description of what "total" means)
total packages
etc...

since this is an informational page, perhaps show MN description; link to MN description document
(pseudo json data source for this information)

if there is a missing value, show "-" (count of records=0) rather than "0" (sum of records=0)
