Description

The SEAD MN sync'd content correctly to the 3 CNs, but due to a CN to CN misconfiguration issue, the science metadata documents were not replicated to each CN, and therefore the indexing process has only indexed 6 of 12 documents. The ids and their autogen ids are:

I have replicated and reindexed on the CNs the twelve objects that can be found on the SEAD MN via listObjects.

I can perform a search on OneMercury with 'Only results with data.' toggle turned off, selecting the entire earth as a region, and selecting SEAD Virtual Archive as the MemberNode and receive 12 results back.

The three additional objects
