Description			
https://repository.dataone.org/software/cicore/tags/D1_SCHEMA_1_1_1/dataoneErrors.xsd			
does not match the documentation (nodeId property)			
Determine if this is a 1.1.2 update to the schema (and so not impacting namespace), and if so, update the schema, create a new tag, and update references to the current schema.

It looks like this went the other way around: The documentation still has 'pid' as the field for the pid in the html table (and identifier in the xml display), yet starting in v2 of the schemas, the field has been changed to 'identifier'.

We'll still need to resolve which to use (pid or identifier), then update accordingly.
