<b>Milestone:</b>	None		
<b>Product Version:</b>	1.2.4		

#### Description

This replacement needs to be performed before the process daemon is started after the upgrade:

Need to copy the metacat password value into the replication.properties file.

file is located at: /etc/dataone/process/replication.properties

property is: metacat.datasource.password

deployed value is the default password value which does not match production.
