**Description**

Apply CN merge strategies on the 3 CN system metadata. Output is the merged SystemMetadata in the MergeReport (along with changed attr items to report). Apply the MN merge strategies on the resulting single system metadata. Use the AuthMN from the resulting sysmeta to pull the AuthMN's sysmeta for merging. Output is the merged SystemMetadata in the MergeReport (along with changed attr items to report). A MergeReport tracks changes for each attribute in the MergeReportTable. MergeJob returns MergeReport.

History
