Here's what we know regarding RGD going down:

- Amber spoke with Allison Boyer at the ESA and she indicated that (in her opinion) RGD shouldn't really be considered a MN. It is not a separate repository but a subset of existing data. She asked us to make it down.
- Diane Wright on 7/14/2017: "The ORNL DAAC is no longer hosting the RGD xml metadata records. These records are the ones that DataONE has in the RGD member node. These are an odd case because we never had the data themselves, just the metadata records. RGD was never an entity, per se, it was just a list of metadata records that were searchable in our search engine. We have moved to a different search engine and those records are no longer available. Additionally, the RGD xml metadata are out of date; most of the Web URLs are bad now. We have no plans to update the records."

- *Sprint set to Ongoing Operational*

#18 - 2018-01-30 18:08 - Amy Forrester

11/1/2018: {from SanthanaVannan, Suresh} The RGD member node contained pointers to data that existed in other locations, so we can safely shutdown the RGD node.
