src/main/java has XML files - Suggest these move to src/main/resources			

### History

#### #1 - 2014-03-31 18:47 - Rob Nahf

- Category set to d1\_common\_java
- Assignee set to Robert Waltz

these files are:

binding.xml  
binding\_v1.xml  
binding\_v1\_1.xml

Do they need to be under src/main/java, or can we put them in org/main/resources?  
Maybe we should put a note about why they need to be under the java subdir if they need to stay in place.
