Description

src/main/java has XML files
- Suggest these move to src/main/resources

History

#1 - 2014-03-31 18:47 - Rob Nahf

- Category set to d1_common_java

- Assignee set to Robert Waltz

these files are:

binding.xml
binding_v1.xml
binding_v1_1.xml

Do they need to be under src/main/java, or can we put them in org/main/resources?
Maybe we should put a note about why they need to be under the java subdir if they need to stay in place.
