Description			
<ul style="list-style-type: none"><li>Regarding the style: A good addition to the types would be some builders, static factories and constructors as applicable (the implementations are verbose and repetitive) Consider how a Log assembly could look with the builder pattern: <code>Log log = Log.builder().add( LogEntry.builder().entryId("1").ipAddress("127.0.0.1").userAgent("Tim").build()) .add( LogEntry.builder().entryId("1").ipAddress("127.0.0.1").userAgent("Tim").build()) .build();</code></li></ul>
