Regarding HttpClient and component versions, it's a rough transition from 4.1 to 4.3, due to the change in connection manager code introduced in v4.2, and the deprecation of related classes for 4.3. We are making d1\_libclient\_java compatible with v4.2 to maintain backwards compatibility, and introduce 4.3 in libclient\_java 2.0. Clients can likely use httpClient v4.3 classes in libclient\_java 1.3+, but it is untested by DataONE, and libclient\_java v2.0 is recommended instead.
