

Infrastructure - Task #469

Define detail error codes in documentation

2010-03-26 00:40 - Dave Vieglais

Status:	Closed	Start date:	
Priority:	Low	Due date:	
Assignee:	Dave Vieglais	% Done:	100%
Category:	Documentation	Estimated time:	0.00 hour
Target version:	CCI-0.3 Deployed	Story Points:	
Milestone:	None		
Product Version:	*		

Description

The detail error codes need to be defined.

For now I will create an integer value for each method that raises an exception- so MN.get will have a value distinct from CN.get when a [NotFound](#) error is raised for example.

This will at least enable identification in the source of where the error was raised without imposing additional requirements on the underlying data providers.

History

#1 - 2010-03-26 13:45 - Dave Vieglais

Detail codes for CN_crud, CN_query, CN_authorization, MN_crud, MN_replication have been set.
