Story # 2804 (Closed): CLI, new features, bugfixes

Fix set command whitespace handling

2014-04-08 20:35 - Chris Jones

Status:	Closed	Start date:	2014-04-08
Priority:	Normal	Due date:	
Assignee:	Roger Dahl	% Done:	100%
Category:	d1_client_cli	Estimated time:	0.00 hour
Target version:		Story Points:	
Milestone:	None		
Product Version:	*		

Description

When using the dataone.cli 'set' command, it throws an error when whitespace is encountered in a value, for instance:

```
set rights-holder CN=Christopher Jones A2108,O=Google,C=US,DC=cilogon,DC=org
ERROR Command takes no required parameters and 2 optional parameters
```

or

```
set rights-holder "CN=Christopher Jones A2108,O=Google,C=US,DC=cilogon,DC=org"
ERROR Command takes no required parameters and 2 optional parameters
```

Fix the whitespace handling in cli._split_args() such that it recognizes quoted strings. This will likely also need to be supported when being read back or written to the settings file.
