Description

I have been assigned a task https://redmine.dataone.org/issues/4467 to test Metacat on Ubuntu 12.04. Since Metacat is one member of CN software stack, we need to test Metacat in CN as well.

I talked with Chris, we decide to use cn-stage-orc-2.test.dataone.org as the test machine. Also we need a new story for this task.

Order of subtasks:
#4726
#4725
#4800
#4727
#4728
#4729

Subtasks:

Task # 4725: Update cn-dev-orc-1 to ubuntu 12.04	**Closed**
Task # 4726: Isolate cn-dev-orc-1 from Round-Robin dns.	**Closed**
Task # 4727: Upgrade dataone-cn-os-core	**Closed**
Task # 4728: Upgrade(install) the rest components	**Closed**
Task # 4729: Run the d1 integration test	**Closed**
Task # 4800: Create ubuntu packages for precise on http://dev-testing.dataone.org/ubunt...	**Closed**
Task # 5130: Automate the upgrade process	**Closed**
Task # 5131: Test if hazelcast works with java 7.	**Closed**
Task # 5334: upgrade ubuntu extras for Java7 and Tomcat7	**Closed**
Task # 5335: after install clear unneeded packages	**Closed**
Task # 5337: create migration script for tomcat7	**Closed**
Task # 5461: create CN Scripts package for unstable	**Closed**

/bin/hostname -f does not return the correct value for dataone. on cn-dev-orc-1, /etc/hosts has dns 'A record' indicating the hostname as cn-dev-orc-1.test.utk.edu. Don't know why!
