Description

I talked with Rob and he said the web tester should work with a member node which has joined to the stage env.

Chris, would you please generated a DataONE key/certificate pair for the mn-demo-11 at your convenience? Then it will join to the stage env. Chris, do you see any issue if the mn-demo-11 join the stage env?

Thanks.

Found the certificate/key in the /home directory. Copied them to /var/metacat/cert. There is no need to generate them again.
