Category:	d1_cn_service	**Estimated time:**	0.00 hour
Target version:	CCI-0.4		
Milestone:	None	**Story Points:**	
Product Version:	*		

Description

The unit tests parse a sample solr result set into various [DataONE](#) result set expressions and compares those results against some statically defined results stored in test resources.

Make certain the solr example result reflect what will be returned by solr with new metadata. Make certain base comparison documents conform to new standards as well.

Run the unit tests to verify.
