Description			
The log event Solr index can be accessed via an endpoint such as https://cn.dataone.org/solr/d1-cn-log . Only the endpoint such as https://cn.dataone.org/cn/v1/log should be available. Currently URLs for <code>./v1/log</code> are rewritten to <code>./solr/d1-cn-log</code> , which is configured in <code>/etc/apache2/conf.d/rewrite_cnlog</code> .
