Description

Need to add the new schema fields to the search engine field description document:
https://repository.dataone.org/software/cicore/trunk/cn-buildout/dataone-cn-index/usr/share/dataone-cn-index/queryFieldDescriptions.properties

Also need to update the architecture doc tables to include these new fields:
http://mule1.dataone.org/ArchitectureDocs-current/design/SearchMetadata.html

Also possibly an end-use targeted documentation section to explain how to use the geohash fields to plot docs/events on a map.
