<b>Description</b> Running Mac OS 10.9.3 Using the example of ocean sunfish (given in task 5511), searching via the fielded search box below the main search bar, data only option turned off.  In Chrome, the fielded search boxes are not pre populated.  1st term: Selected 'fulltest', entered 'ocean', selected 'OR'. 2nd term: Selected 'fulltest', entered 'sunfish', left last box blank. 3rd term: Left blank RESULT: 6 records  In Firefox, the fielded search boxes are pre-populated with 'Full text" and 'Or'. 1st term: Retained 'fulltest', entered 'ocean', retained 'OR'. 2nd term: Retained 'fulltest', entered 'sunfish', retained 'OR'. 3rd term: Retained 'fulltest', left text box blank RESULT: 22150 records  Returned to Chrome to mirror entries in Firefox 1st term: Selected 'fulltest', entered 'ocean', selected 'OR'. 2nd term: Selected 'fulltest', entered 'sunfish', selected 'OR'. 3rd term: Selected 'fulltest', left text box blank RESULT: 22181 records  Despite the 31 record discrepancy, it seems that the second 'OR' is required even though it is a modifier for the 3rd (non existent) search term. Without it, the search is being treated as 'AND' despite the use of the first 'OR' modifier.			

History

#1 - 2014-07-03 14:46 - Skye Roseboom

- Status changed from New to In Progress

#2 - 2014-07-03 14:46 - Skye Roseboom

- Category set to d1\_mercury

- Status changed from In Progress to Testing

- Assignee set to Skye Roseboom

#3 - 2014-07-03 14:47 - Skye Roseboom

Found an error in the logic in how the operators specified in the fielded search were being applied when constructing the solr query.
