<b>Target version:</b> CCI-0.4	
<b>Story Points:</b>	
<b>Description</b>	
As a developer, I need to use Metacat as an object store for storing and retrieving objects and system metadata from the CN.	
-- involves getting Metacat to create() and update() objects that include a systemMetadata object	
-- involves implementing getSystemMetadata() for the CN	
-- involves making sure arbitrarily structured unicode string identifiers can be used within Metacat for storing objects	
--	

### History

#### #1 - 2010-05-20 17:42 - Chad Berkley

The following methods are implemented, tested and working on metacat:

```
get()
getSystemMetadata()
create()
update()
listObjects()
```
