

CN REST - Bug #5739

LDAP upgrades fail with purge of dataone-cn-os-core

2014-07-16 20:47 - Robert Waltz

Target version:			
Story Points:			
Description			
open ldap should continue to function normally on a host after dataone-cn-os-core has been purged (apt-get remove --purge dataone-cn-os-core)			
We should wipe out /etc/ldap/slapd.d, restore it to a simpler configuration, backup and then remove the dataone entries from the openldap database.			
We will need to complete this before migrating to 14.04 of ubuntu
