Target version:			

Description

It is necessary (desired and indicted in proposal) that all products developed on the project would be released with an appropriate, recognized open source license.

h2. Rationale

Open source is a good thing. See http://www.opensource.org/docs/definition.php for more details.

h2. Fit Criteria

- All software developed on the project includes an approved open source license
- Selected licenses do not conflict with the licenses used by components that are extended or utilized by custom software developed on the project
- A software license audit can be successfully passed.
