From Rob:
I registered your test node in our SANDBOX test environment to run our synchronization process. I encountered a simple error that hopefully you have time to fix.

Essentially, one required field was missing in all of the SystemMetadata documents, and needs to be populated before our Coordinating Node can accept it. It is the originMemberNode field, and should be populated with your node identifier.

urn:node:mnTestGBIF

(If you are manually creating the serialized systemMetadata, you'll need to make sure it follows the element, as in this example:
