Description

The default sprint view does not provide a visual clue about the state of a ticket. Would be helpful if closed tickets were crossed out for example. Perhaps:

- closed: strike through
- accepted: light green background

This is complicated by the rendering process used by Agilo, which pulls a JSON representation of the sprint contents and processes using client side JS (at least based on jquery). So will need to modify the JS doing the table rendering, which may be a pita.

History

#1 - 2010-08-04 03:13 - Dave Vieglais

- Status changed from New to Closed

Invalid now after dumping Agilo.
