Description				
Need to fix metacat s	o that <u>CrudService</u> can be ins	stantiated as a singleton without having	g to pass in Servlet parameters.

- Status changed from New to Closed

<u>CrudService</u> is now a singleton. Several of the methods in <u>MetacatHandler</u> still return xml, but they can be pretty easily changed now to throw exceptions and return data structures instead of xml.

I also wrote a test for CrudService. Right now it only includes a create() test, but will soon test all functions in CrudService.
