#### Description

I used a curl command to delete the an object from mn-sandbox-ucsb-1. However, I still can read the the system metadata:  
<https://mn-sandbox-ucsb-1.test.dataone.org/knb/d1/mn/v1/meta/tao.13069.1>

In the systemmetadata table:

guid	serial_version	date_uploaded	rights_holder	checksum	checksum_algorithm	origin_member_node	authoritive_member_node	date_modified	submitter	object_format
------	----------------	---------------	---------------	----------	--------------------	--------------------	-------------------------	---------------	-----------	---------------
