Description

In our the pom.xml of the d1_libclient_java 1.3.0 release, i saw something like:

```
com.googlecode.foresite-toolkit
foresite
1.0-SNAPSHOT
jar
```

I saw this in 1.2.4 and 1.2.5 releases as well.

I guess that this can make our release kind of unstable since the things may changed in the 1.0 SNAPSHOT. And also the maintenance of this jar file can be not very well. Today I got the error when I tried to build a Metacat in a new VM:

```
artifact:dependencies] Unable to resolve artifact: Unable to get dependency information: Unable to read the metadata file for artifact
'com.googlecode.foresite-toolkit:foresite:jar': Cannot find parent: org.sonatype.oss:oss-parent for project:
com.googlecode.foresite-toolkit:foresite:jar:1.0-SNAPSHOT for project com.googlecode.foresite-toolkit:foresite:jar:1.0-SNAPSHOT
[artifact:dependencies] com.googlecode.foresite-toolkit:foresite:jar:1.0-SNAPSHOT
[artifact:dependencies]
```

I checked and found the current release for the artifact is 0.9. Do we need some new features in 1.0?
