Tests on MN was done.

Tests on CN: wait Skye to merge the change in DeleteTask from the trunk to the release branch. Then test the change on the sandbox env.

Also will discuss with Skye with the removal of system metadata.

MN.delete works fine in sandbox env.

CN.delete works fine as well among the three cns in sandbox env.

I haven't test to delete replicas from cn since now i can't create replicas right now.
