Infrastructure - Task #6479

Bug # 3998 (Closed): Log Aggregation is not handling equivalent identities correctly

update SessionAuthorizationUtils to handle nonStandardizable Subject values

2014-09-25 21:15 - Rob Nahf

Status:	Closed		**Start date:**	2014-09-25
Priority:	Normal		**Due date:**	
Assignee:	Rob Nahf		**% Done:**	100%
Category:	d1_cn_solr_extensions		**Estimated time:**	0.00 hour
Target version:	CCI-1.4.1			
Milestone:	None		**Story Points:**	
Product Version:	*			

Description

CertificateManager.standardizeDN(String v) throws the RuntimeException IllegalArgumentException, and is not handled by SerssionAuthorizationUtils.addAuthenticatedSubjectsToRequest(..)

SInce subjectInfos will potentially contain non- X500Principal compatible Subject values, the method needs to leave those values unstandardized.

History

#1 - 2014-10-02 19:30 - Rob Nahf

- Status changed from In Progress to Testing

committed changes in latest branch. need to test it.

#2 - 2014-10-02 19:34 - Robert Waltz

- Target version changed from CCI-1.4.2 to CCI-1.4.1

#3 - 2014-10-30 19:57 - Rob Nahf

- translation missing: en.field_remaining_hours set to 0.0

- Status changed from Testing to Closed

- % Done changed from 80 to 100

deployed to sandbox and re-harvested log records and re-indexed. Fortune had it that there were 51 LTER records that have the string 'null' as values for rightsHolder and submitter field in their system metadata, and I was able to view the null (under readPermission field) from the query/logsolr endpoint.
