Description

The aggregation index will need to be updated to include non DN or non-valid D1 constants subject name. Probably force a put on any systemMetadata record that has a log record(i guess all of them...). Or write a background process that will fix it.

History

#1 - 2014-10-02 19:34 - Robert Waltz

- Target version changed from CCI-1.4.2 to CCI-1.4.1

#2 - 2014-10-07 19:36 - Rob Nahf

- Status changed from New to Rejected

- translation missing: en.field_remaining_hours set to 0.0

Since we don't have any consumers of LogAggregation yet, it was decided in today's maintenance meeting to not write a special script, and to not do a special index update, since a planned one is happening in conjunction with upgrading to SOLR 4 (around the end of the calendar year).
