Java Client - Task #6511

remove the deprecated MultipartRequestHandler class from d1_common_java

2014-10-06 23:22 - Rob Nahf

Status:	New		**Start date:**	2014-10-06
Priority:	Normal		**Due date:**	
Assignee:	Rob Nahf		**% Done:**	0%
Category:	d1_common_java		**Estimated time:**	0.00 hour
Target version:	CLJ-2.0.0			
Story Points:				

Description

This class is problematic in that it duplicates work done in d1_libclient_java and creates a dependency on apache HttpClient that is not free from implementation detail. The other classes in this package handle the MimeMultipart packaging and unpack aging, and RestClient in d1_libclient_java provides the tested way of doing HTTP with mime-multipart.

If a lightweight client is desired by the CN infrastructure, consider moving to d1_cn_common, otherwise delete when we move to v2.0 of d1_common_java and d1_libclient_java.

History

#1 - 2015-02-11 20:04 - Rob Nahf

- Project changed from Infrastructure to Java Client

- Category changed from d1_common_java to d1_common_java

- Assignee changed from Robert Waltz to Rob Nahf

- Target version changed from CCI-2.0.0 to CLJ-2.0.0
