#### Description

CN-SANDBOX initiated synchronization once the mnTestLTER node capabilities were registered in the CN-SANDBOX LDAP, even though the d1NodeApproved attribute was set to "false". As far as I am aware, the mnTestLTER node was never registered on CN-SANDBOX prior to this event.

- Assignee set to Robert Waltz

##### #3 - 2015-10-09 17:38 - Laura Moyers

The same thing has happened with tDAR (mnTestTDAR) in sandbox. Node reg doc currently (10/9/15) shows lastHarvest date of 7/6/2015.
