Target version:	CCI-0.4	Story Points:	
Milestone:			
Product Version:	*		

Description

A trailing slash seems to be added to identifiers in the list objects response, is needed for the get() method, and getSystemMetadata(), but the identifier returned in getSystemMetadata has no trailing slash, hence does not match.

List one object:

```
curl -H "Accept: text/xml" "http://129.24.0.11/mn/object?start=23&count=1"
```

identifier = "hdl:10255/dryad.167/mets.xml_data/"

get object:

```
curl "http://129.24.0.11/mn/object/hdl%3A10255/dryad.167/mets.xml_data/"
```

getsystemmetadata:

```
curl -H "Accept: text/xml" "http://129.24.0.11/mn/meta/hdl%3A10255/dryad.167/mets.xml_data/"
```

identifier = hdl:10255/dryad.167/mets.xml_data

History

- Status changed from New to Closed

#2 - 2010-06-23 13:56 - Dave Vieglaiss

- Status changed from Closed to 4

Re-opening this bug because testing still fails on dryad MN.

The identifier expressed in system metadata does not match the identifier used to retrieve the system metadata though getSystemMetadata or listObjects().

#3 - 2010-07-30 16:07 - Roger Dahl
