Description			
The following issue was reported by Ethan White:			
http://pythonhosted.org/DataONE_ClientLib/install.html#preferred-install-method recommends using:			
sudo easy_install DataONE_LibClient			
which errors with:			
ethan@oryx:~/~\$ sudo easy_install DataONE_LibClient			
Searching for DataONE-LibClient			
Reading https://pypi.python.org/simple/DataONE_LibClient/			
Reading https://pypi.python.org/simple/DataONE-LibClient/			
Couldn't find index page for 'DataONE_LibClient' (maybe misspelled?)			
Scanning index of all packages (this may take a while)			
Reading https://pypi.python.org/simple/			
No local packages or download links found for DataONE-LibClient			
error: Could not find suitable distribution for Requirement.parse('DataONE-LibClient')			
It appears the correct library name and associated instructions would now be:			
sudo easy_install dataone.libclient			
Ethan			

History

#1 - 2015-01-13 19:12 - Matthew Jones

- Project changed from Infrastructure to Python CLI
- Due date deleted (2015-01-13)
- Category deleted (d1_python)
- Target version deleted (Release Backlog)
- Start date deleted (2015-01-13)

#2 - 2015-01-14 05:46 - Mark Servilla

The "easy_install" method of installing the DataONE_ClientLib found at http://pythonhosted.org/DataONE_ClientLib/install.html#preferred-install-method has apparently been deprecated for some time now; it should be permanently removed from PyPI. The preferred method is to use "pip install" as documented here: <http://pythonhosted.org/dataone.libclient/setup-d1-client.html>.
