Description

Verify that System Metadata, Science Metadata, Data, and Resource Maps are processed correctly by the CN (synchronization, indexing, ONEMercury). If choosing replication regardless of operating tier, verity that the MN's stated replication policy is being executed. If Tier 4, verify that MN can serve as a replication target.

Indexing and sync worked fine from a MN perspective. A number of objects did not sync, though it appears to be an issue with CN side connections timing out. To be investigated further under CN activities.
