

Infrastructure - Bug #6895

Complete obsolescence chain is being displayed for LTER content in ONEMercury

2015-03-17 18:28 - Mark Servilla

Status:	Rejected	Start date:	2015-03-17
Priority:	Normal	Due date:	
Assignee:	Dave Vieglais	% Done:	0%
Category:	d1_mercury	Estimated time:	0.00 hour
Target version:		Story Points:	
Milestone:	None		
Product Version:	*		
Description			
<p>ONEMercury displays all data packages (as denoted by ORE maps) within a single obsolescence chain for LTER objects synchronized through PASTA-GMN (https://gmnlternet.edu/mn) - for example, see this search: https://cn.dataone.org/onemercury/send/facetsQuery2?filterForDataHidden=true&term1=text+%3A+Sharma+%term1.attribute=text&op1=&term3.attribute=overlaps&term3=%2C%2C%2C&op3=&term8=either&pageSize=10&start=0&sortattribute=default&facetattribute=datasource&facet=urn%3AAnode%3ALTER&facetattribute=author&facet=Sapna%20Sharma.</p> <p>System metadata for each of the three packages in the above example search contain, what appears to be, correct "obsoletes" and "obsoletedBy" elements (see attachment).</p>

While the resource maps look to have a correct obsolescence chain, the science metadata don't. I would expect the EML doc version 2 to obsolete version 1 and to be obsoleted by version 3, but I'm not seeing that:

<https://cn.dataone.org/cn/v1/meta/https://pasta.lternet.edu/package/metadata/eml/knb-lter-ntl/10001/2>

To test this, perhaps call `CN.setObsoletes()` to update the system metadata, and see if ONEMercury displays the versions correctly after that.

#4 - 2019-04-30 22:26 - Dave Vieglais

- Status changed from New to Rejected

Closing with deprecation of ONEMercury
