Description			
Replace MMP workaround with more robust solution			

History

#1 - 2010-06-28 21:00 - Chad Berkley

I've researched this a bit more and it seems the technology I was going to use, mimepull, is a bit immature and has not been worked on in 2 years. Need to reevaluate this. Maybe go back to cos.jar which morpho uses. Should probably push this off until after the [DataOne](#) prototype is done since it may take more time than we want to spend right now.

#2 - 2010-06-29 19:12 - Chad Berkley

putting this back into the backlog until after the july deadline.

#3 - 2010-08-02 20:39 - Chad Berkley

- Status changed from New to Closed

Changed this to use my own implementation based on the MMP RFC1341 (http://www.w3.org/Protocols/rfc1341/7_2_Multipart.html). This implementation is memory bound so it should be revisited, however it does work for the prototype.
