Description			
We have an initial work on MN.getPcakge and CN.getPackage. But we still need some work to be done.

MN.getPackage() accepts a packageType (Types.ObjectFormatIdentifier);
the ones that make sense, which currently have tests are:
application/zip
application/x-gzip
application/x-bzip2
application/x-tar
application/x-rar-compressed
(see org.dataone.integration.it.functional.MNPackageFunctionalIT)
Do we want to support all of these?

Right now they are returning exceptions like this:
NotFound: 1800:: No system metadata could be found for given PID: application%2Fzip/testGetPackage_resourceMap_20152099521112

(this was on mn-demo-8.test.dataone.org)

#4 - 2015-08-18 23:35 - Jing Tao

So far, we only support applicaton/bagit and zip as the serialization type.

The test also passed.

#5 - 2015-08-21 18:07 - Jing Tao

Andrei and I tested it. It worked.
