Test Resources - Task #7144

Ensure the Webtester infrastructure tests for incomplete system metadata

2015-06-02 18:21 - Mark Servilla

Description

Recently, it was found that the CN infrastructure would allow partial synchronization of an object when the object's system metadata was incomplete (see #7129 and #7130). The Webtester should test for incomplete system metadata received from a Member Node.

History

#1 - 2015-06-02 18:21 - Mark Servilla

- Related to Bug #7129: Synchronization allows objects with incomplete system metadata to proceed into system added

#2 - 2015-06-02 18:21 - Mark Servilla

- Related to Bug #7130: Metacat allows partial storage of objects when the object's system metadata is incomplete added

#3 - 2015-06-02 20:14 - Dave Vieglais

Note also that some of the evaluation needs to be programmatic rather than relying on schema validation. The dateUploaded element is a good example - it is optional according to the schema, but required for metadata coming from a Member Node.
