Description			
None of the deployed Metacat instances appear to be returning objects or system metadata.			
e.g.			
id = test.2010181122146255 is returned by listObjects			
http://knb-mn.ecoinformatics.org/knb/meta/test.2010181122146255 returns a 500 error

This was a bug where the sessionData object in metacat is null (because the session is public) but the code tried to call sessionData.getUserName() anyway. This is fixed now.
