Infrastructure - Bug #7250

Accounts endpoint throwing exception

2015-07-07 19:00 - Andrei Buium

Status:	Closed	**Start date:**	2015-07-07
Priority:	Normal	**Due date:**	
Assignee:	Ben Leinfelder	**% Done:**	100%
Category:	d1_identity_manager	**Estimated time:**	0.00 hour
Target version:	CCI-2.0.0		
Milestone:	CCI-2.0	**Story Points:**	
Product Version:	*		

Description

Accessing the accounts endpoints:

https://cn-dev-ucsb-1.test.dataone.org/cn/v1/accounts
https://cn-dev-ucsb-1.test.dataone.org/cn/v2/accounts

Yields a ServiceFailure:

Internal Server Error: The server encountered an unexpected condition which prevented it from fulfilling the request.

History

#1 - 2015-08-05 23:34 - Ben Leinfelder

- % Done changed from 0 to 30

- Milestone changed from None to CCI-2.0

- Category set to d1_identity_manager

- Status changed from New to In Progress

- Target version set to CCI-2.0.0

There was a "cn=test,dc=cilogon,dc=org" entry in LDAP that was classified as a d1Principal and also a group and did not have a "sn" attribute. This resulted in a null familyName and JIBX threw an exception when serializing the SubjectInfoList.

I removed this entry from the dev LDAP server, but I'd like to know how it got in there so we can make sure it does not happen again.
