

Infrastructure - Bug #7264

CNCore.hasReservation null Subject parameter

2015-07-17 06:06 - Rob Nahf

Status:	Closed	Start date:	2015-10-17
Priority:	Normal	Due date:	
Assignee:	Dave Vieglais	% Done:	100%
Category:	Architecture Design	Estimated time:	0.00 hour
Target version:	CCI-2.0.0	Story Points:	
Milestone:	None		
Product Version:	*		
Description <p>While testing synchronization, noticed that the CNCore.hasReservation method takes 2 parameters (aside from the Session), the pid and the subject, but has no InvalidRequest exception - something that could be returned if either parameter was null, especially the subject, since it is a query-parameter.</p> <p>The hasReservation implementation in d1_identity_manager looks like it would blow up with an NPE if the subject parameter was null.</p> <p>I think we need to add InvalidRequest to the method signature (in V2).</p> <p>(hasReservation is routinely called by synchronization, and if an MN neglects to populate the submitter fields in the systemMetdata it holds, we'd likely be seeing a lot of SyncFaileds due to NPEs)</p>			
Subtasks: <p>Task # 7443: add InvalidRequest to hasReservation signature in documentation</p>

- Status changed from New to In Progress

The CN controller was checking for cases when the subject parameter was not provided in the request, but I added an extra check in the underlying implementation that also checks for nulls.
