Description

For the dataone-cn-os-core buildout package, we have LDIF files with pre-configured Coordinating Node entries for the capabilities of the node. Add the DEV2 CNs to these files. Since this is being added to the trunk, the new entries in the LDIF files may need to be manually added to the DEV2 CN's LDAP database (given that we are installing the tagged CCI 1.5.2 versions).

Associated revisions

Revision 16019 - 2015-07-24 17:31 - Chris Jones

Add the base DEV2 node list to the dataone-cn-os-core buildout. This only includes the router address, along with the UCSB and UNM CNs. refs #7269

Revision 16019 - 2015-07-24 17:31 - Chris Jones

Add the base DEV2 node list to the dataone-cn-os-core buildout. This only includes the router address, along with the UCSB and UNM CNs. refs #7269
