<b>Milestone:</b>	None		
<b>Product Version:</b>	*		
<b>Description</b>			
From Ben's 07/24/2015 email:			
<p>1. Find the public key for the certificate used by the server. The dataone-cn-portal buildout postinst script will create a file based on the public certificate that is configured for the given CN (usually a wildcard for the domain). For our test environments, it is: /etc/ssl/certs/_test.dataone.org.crt.publickey It's the stuff between BEGIN/END PUBLIC KEY. I can't remember if I leave the delimiters or not. Safest to leave them.</p> <p>1. Register this public key with CILogon to get a myproxy id: <a href="https://cilogon.org/oauth/register">https://cilogon.org/oauth/register</a> You should only register with the round-robin hostname (once per environment) and use URLs that are not machine-specific. Here's an example from SANDBOX2: Name: DataONE Coordinating Node - Sandbox 2 Home uri: <a href="https://cn-sandbox-2.test.dataone.org/portal">https://cn-sandbox-2.test.dataone.org/portal</a> Failure uri: <a href="https://cn-sandbox-2.test.dataone.org/portal/pages/client-error.jsp">https://cn-sandbox-2.test.dataone.org/portal/pages/client-error.jsp</a> Creation time: Wed Jan 28 17:37:48 CST 2015 Generated identifier: myproxy:oa4mp,2012:/client/66a303882b6e4bec1e91cbf2ccda1e8</p> <p>2. Include this myproxy id in the portal configuration file. Config file: /var/lib/tomcat7/webapps/portal/WEB-INF/client.xml For more permanent CN buildouts (e.g., DEV2), include it in the dataone-cn-portal postinst script such that the correct myproxy id will be set in the config file on installation in this environment (there is a big condition block for this).</p> <p>3. By now, CILogon will have reported back to the email address you registered with that the myproxy client registration is active.</p>

- Description updated

- Status changed from In Progress to Closed

Instead of going through the full registration, I used the DEV env key:

myproxy:oa4mp,2012:/client/24a10c2cd8bda4e6b5cf244ab7532b2

and was able to log into the portal just fine.
