Target version:		Story Points:	
Milestone:	None		
Product Version:	*		

Description

SSL is deprecated, we need a simple script to verify that servers are operating in a secure manner with at least SSL v2 and v3 disabled in apache.

Some options:

1. Use openssl s_client
2. SSL Labs API, e.g. <https://github.com/TrullJ/ssllabs>

History

#1 - 2015-08-11 18:37 - Dave Vieglais

- Status changed from New to In Progress

- % Done changed from 0 to 30

#2 - 2015-08-11 22:05 - Dave Vieglais

- Status changed from In Progress to Closed

- % Done changed from 30 to 100

- translation missing: en.field_remaining_hours set to 0.0

Script is available at:
