

Python Libraries - Bug #7299

SolrConnection fails if persistent property is not set to True

2015-08-18 15:28 - Dave Vieglaiss

Status:	New	Start date:	2015-08-18
Priority:	Normal	Due date:

Target version:			
Story Points:			
Description The constructor for SolrConnection accepts a "persistent" property that indicates if the instance should attempt to keep client connections open rather than closing after each request. Setting this to False causes the connection attempt to immediately fail with error "ResponseNotReady". Overall, the solr connection should probably be refactored to use the python "requests" package, which offers a far more stable HTTP client.
