Product Version:	*		

Description

This command /package/package-type/identifier has two elements. If both package-type and identifier have a slash, e.g., /package/application%2Fbagit/myid%2F12345, the test case still should work.

Can we have a test case with two identifier elements which contain encoded characters?

History

#1 - 2015-08-20 17:09 - Andrei Buium

- Status changed from New to Closed

- % Done changed from 0 to 100

- translation missing: en.field_remaining_hours set to 0.0

Added test for this situation, ran it and debugged through it as well, verified that the result is as expected.
