Target version:	CCI-2.0.0	Story Points:	
Milestone:	None		
Product Version:	*		
Description Currently, the mn.updateSystemMetadata method only accept the new system metadata which has a higher version than the current one on the MN. So the client has to increase the serial version. However, the correct behavior should be that the serial version of the new system metadata can equal the current version on the MN and the mn increase the version. So it is not necessary for clients to increase the serial version.			

History

#1 - 2015-09-17 00:14 - Jing Tao

- Parent task set to #6498

#2 - 2015-09-18 23:48 - Jing Tao

- Status changed from New to Rejected

- translation missing: en.field_remaining_hours set to 0.0

Only CN.setReplicaStatus and CN.updateReplicationMetadata will increase serialVersion number.
