

CN REST - Bug #7383

CN.registerNode() fails when nodeReplicationPolicy is partially present

2015-09-23 23:08 - Ben Leinfelder

Status: Rejected	Start date: 2015-09-23
Priority: Normal	Due date:

Category: d1_cn_noderegistry	Estimated time: 0.00 hour
Target version:	
Story Points:	
Description	
<p>Andrei submitted a Node document to cn-dev-2 for registration, but it was rejected because the registration code only checked if NodeReplicationPolicy was null before trying to access other properties of the policy (that were absent). His Node xml simply had:</p>	
<p>The schema does not require any child elements: http://jenkins-1.dataone.org/jenkins/job/API%20Documentation%20-%20trunk/ws/api-documentation/build/html/apis/Types.html#Types.NodeReplicationPolicy</p>	
<p>We should ensure that schema-valid Node documents are accepted, even if they do not necessarily make sense. In this case, there was no information provided. The schema probably should require at least one child element otherwise what is the point of including it? But I'm afraid we can't change the schema at this point.</p>
