Move hazelcast processing cluster to CN Rest Service

2015-10-06 19:48 - Robert Waltz

Status:	Closed	Start date:	2015-10-06
Priority:	Normal	Due date:	
Assignee:	Robert Waltz	% Done:	100%
Category:	d1_cn_service	Estimated time:	0.00 hour
Target version:	CCI-2.0.0		
Story Points:			
Description			
d1_processing originally used hazelcast for distributed task execution, distributed locking, distributed queueing and distributed maps.			
Due to increased responsibilities of the CN Rest Service in V2, circular dependencies arose between applications running in Tomcat and the d1_processing daemon instance.			
It was decided to migrate the hazelcast processing cluster to Cn Rest Service and make d1-processing a client to the cluster.			
Subtasks:			
Task # 7413: Alter Synchronization to run as a client to the CN Rest Service Hazelcast ...			Closed
Task # 7414: Alter LogAggregation to run as a client to the CN Rest Service Hazelcast c...			Closed
Task # 7415: Add Hazelcast Instance configuration to Cn Rest Service			Closed
Task # 7416: Alter replication and replication auditor to run as a client to the CN Res...			Closed
