<b>Description</b>			
d1-libclient-java in V1 implemented 'pidFilter' in the getLogRecords method. However, in v2, 'pidFilter' has been renamed 'idFilter' for both v1 and v2 log endpoints.

the fix mistakenly changed the parameter name for v1 as well as v2. (That's to say that the ticket shouldn't have asked to change the parameter name in the v1 implementation.)

The new fix that reverts the parameter to 'pidFilter' for v1 implementations should be applied to trunk, the v2.3 branch, and maybe the other v2.x branches as well.
